

Samax Precision, Inc.

Samax Precision Inc. acquires new **Mori Seiki NTX 1000 Multi-Axis Turning Center**

Sunnyvale, CA based Manufacturer of precision machined parts, Samax Precision Inc. has furthered it's capabilities to include a fully integrated mill-turn machining center (3D 5 axis) to its existing fleet of machines. The Mori Seiki NTX 1000 is the ideal choice for machining small precision parts, which have complex shapes but need high-precision and high-efficiency machining. The new equipment allows Samax to increase productivity, reduce overall cost, all while maintaining a "high level of quality".

**We are located in the heart of the Silicon Valley,
California**
